The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 60-63, 65, 67-72, 74-76, 78-90 , 92 and 94-96 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 94 is indefinite in reciting "a method of capturing gas phase pollutants in a combustion system down stream of a combustion zone", but fails to recite any positive process steps for achieving such objective. For example, there is no requirement that particles be injected into the combustion system. In claim 92, there is no antecedent basis for "the air preheater" or "the flue gas". In claim 85, there is no antecedent basis for "the optimal locations". In claim 95, line 8 and claim 96, line 7, there is no antecedent basis for "the injected particles".

Claims 13-19 and 93 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: The McCollor Declaration filed under 37 CFR 1.132 on September 5, 2008 establishes that CHEMKIN and FLUENT are off-the-shelf software tools, and that one of ordinary skill in the art would understand how to properly configure and program them. Accordingly the rejection under the first paragraph of 35 USC 112 is withdrawn.
